

UNITED STATES DISTRICT COURT  
NORTHERN DISTRICT OF TEXAS

WILLIAM KIRBY *individually and on  
behalf of all others similarly situated,*

Plaintiff,

v.

SNOWFLAKE, INC. and AT&T INC.,

Defendants.

Case No.: 3:24-cv-01934

**CLASS ACTION COMPLAINT**

**JURY TRIAL DEMANDED**

**CLASS ACTION COMPLAINT**

Plaintiff, William Kirby (“Plaintiff”), individually and on behalf of the Class defined below of similarly situated persons, alleges the following against Defendants Snowflake, Inc. (“Snowflake”) and AT&T Inc. (“AT&T”) (collectively, “Defendants”), based upon personal knowledge with respect to himself and on information and belief derived from, among other things, investigation by counsel as to all other matters:

**SUMMARY OF THE CASE**

1. This action arises from Defendants’ failure to secure the personal identifiable information (“PII”)<sup>1</sup> of Plaintiff and the members of the proposed Class, where Plaintiffs are current and former customers of AT&T, which uses Snowflake for cloud storage.

2. Snowflake is a cloud storage service used by 9,437 customers, which are often large global companies which, in addition to AT&T, include Adobe, Kraft Heinz, Mastercard, HP,

---

<sup>1</sup> The Federal Trade Commission defines “identifying information” as “any name or number that may be used, alone or in conjunction with any other information, to identify a specific person,” including, among other things, “[n]ame, Social Security number, date of birth, official State or government issued driver’s license or identification number, alien registration number, government passport number, employer or taxpayer identification number.” 17 C.F.R. § 248.201(b)(8).

Nielsen, Novartis, PepsiCo, Siemens, and NBC Universal.<sup>2</sup> One of Snowflake's customers is AT&T.<sup>3</sup>

3. AT&T is a multinational telecommunications corporation and, with its subsidiaries and affiliates, is one of the United States's most popular wireless carriers and Internet providers.

4. On information and belief, between April 14, 2024, and April 25, 2024, an unauthorized party began a series of hacks into Snowflake's systems, ultimately obtaining the PII and private location data of approximately 110,000,000 current and former customers of AT&T, including Plaintiff (the "Data Breach").<sup>4</sup>

5. The PII and other private information intruders accessed and infiltrated from Defendants' systems included, at the very least names, phone call and text message records of nearly all AT&T cellular customers, including location information from cellular tower records.<sup>5</sup>

6. As a result of the Data Breach, which Defendants failed to prevent, the PII and other private information of AT&T's customers, including Plaintiff and the proposed Class Members, was stolen.<sup>6</sup>

7. Instead, Defendants disregarded the rights of Plaintiff and Class Members by intentionally, willfully, recklessly, and/or negligently failing to implement reasonable measures to safeguard Defendant AT&T customers' PII and by failing to take necessary steps to prevent unauthorized disclosure of that information. Defendants' woefully inadequate data security measures made the Data Breach a foreseeable, and even likely, consequence of their negligence.

<sup>4</sup> See <https://www.sec.gov/ix?doc=/Archives/edgar/data/0000732717/000073271724000046/t-20240506.htm> (last visited July 22, 2024).

<sup>5</sup> <https://www.blumenthal.senate.gov/newsroom/press/release/blumenthal-hawley-demand-answers-from-atandt-snowflake-following-massive-data-breach> (last visited July 22, 2024).

<sup>6</sup> *See id.*

8. Further exacerbating Plaintiff's injuries, Defendants has offered insufficient assurances that all personal data or copies of data have been recovered or destroyed, or that Defendants have adequately enhanced their security practices or dedicated sufficient resources and staff to avoid a similar breach of its network in the future.

9. As a direct and proximate result of the Data Breach, Plaintiff and Class Members have suffered actual and present injuries, including but not limited to: (a) present, certainly impending, and continuing threats of identity theft crimes, fraud, scams, and other misuses of their PII; (b) diminution of value of their PII; (c) loss of benefit of the bargain (price premium damages); (d) loss of value of privacy and confidentiality of the stolen PII; (e) illegal sales of the compromised PII; (f) mitigation expenses and time spent responding to and remedying the effects of the Data Breach; (g) identity theft insurance costs; (h) "out of pocket" costs incurred due to actual identity theft; (i) credit freezes/unfreezes; (j) expense and time spent on initiating fraud alerts and contacting third parties; (k) decreased credit scores; (l) lost work time; and (m) anxiety, annoyance, and nuisance; (n) continued risk to their PII, which remains in Defendants' possession and is subject to further breaches so long as Defendants fail to undertake appropriate and adequate measures to protect Plaintiff's and Class Members' PII.

10. Plaintiff and Class Members would not have provided their valuable PII had they known that Defendants would make their PII Internet-accessible, not encrypt personal and sensitive data elements and not delete the PII it no longer had reason to maintain.

11. Through this lawsuit, Plaintiff seek to hold Defendants responsible for the injuries they inflicted on Plaintiff and Class Members due to their impermissibly inadequate data security measures, and to seek injunctive relief to ensure the implementation of security measures to protect the PII that remains in Defendants' possession.

12. The exposure of one's PII to cybercriminals is a bell that cannot be un-rung. Before this Data Breach, Plaintiff's and the Class's PII was exactly that—private. Not anymore. Now, their PII is forever exposed and unsecure.

#### **JURISDICTION AND VENUE**

13. The Court has subject matter jurisdiction over this action under the Class Action Fairness Act, 28 U.S.C. § 1332(d)(2). The amount in controversy exceeds \$5 million, exclusive of interest and costs. Upon information and belief, the number of Class Members is about 110,000,000 people, many of whom have different citizenship from Defendants. Thus, minimal diversity exists under 28 U.S.C. § 1332(d)(2)(A).

14. The Court has specific personal jurisdiction over Defendant Snowflake because it has availed itself of the rights and benefits of the state of Texas by conducting substantial business in this forum, including but not limited to, business with its client, AT&T.

15. The Court has general personal jurisdiction over Defendant AT&T because its principal place of business is in this District and the acts and omissions giving rise to Plaintiff's claims occurred in this District.

16. Venue is proper in this Court pursuant to 28 U.S.C. § 1391, because it is the District within which Defendants have the most significant contacts.

#### **PARTIES**

17. Plaintiff William Kirby is, and at all relevant times has been, a resident and citizen of Tennessee, where he intends to remain.

18. Defendant Snowflake is a Delaware corporation with its headquarters and principal place of business located at 106 E. Babcock Street, Suite 3A, Bozeman, Montana 59715.

19. Defendant AT&T is a Delaware corporation with its headquarters and principal place of business located at 208 S Akard St, Dallas, Texas 75202.

### **FACTUAL ALLEGATIONS**

#### **A. The Data Breach**

20. As a condition of receiving AT&T services, Plaintiff and Class Members were required to provide AT&T their sensitive and confidential PII, including their call records, text messages, and location data from cellular tower records.

21. From about mid-April 2024, a cybercriminal began a series of hacks into Snowflake's systems, ultimately obtaining, among other documents including 380 million customer profiles, the sensitive PII including calls, text messages, and location data of approximately 110 million current and former customers of AT&T, including Plaintiff's.<sup>7</sup>

22. The leaked material contains multiple references to "SNOWFLAKE," suggesting the AT&T's PII was stolen from Snowflake's cloud servers.<sup>8</sup>

23. Defendants did not use reasonable security procedures and practices appropriate to the nature of the sensitive information they were maintaining for Plaintiff and Class Members, such as encrypting the information or deleting it when it is no longer needed, causing the exposure of PII.

24. As evidenced by the Data Breach, the PII contained in Defendants' network was not encrypted. Had the information been properly encrypted, the data thieves would have exfiltrated only unintelligible data.

#### **B. The Value of PII**

25. In April 2020, ZDNet reported in an article titled "Ransomware mentioned in

---

<sup>7</sup> *Supra* n.2.

<sup>8</sup> *Id.*

1,000+ SEC filings over the past year”, that “[r]ansomware gangs are now ferociously aggressive in their pursuit of big companies. They breach networks, use specialized tools to maximize damage, leak corporate information on dark web portals, and even tip journalists to generate negative news for complaints as revenge against those who refuse to pay.”<sup>9</sup>

26. In September 2020, the United States Cybersecurity and Infrastructure Security Agency published online a “Ransomware Guide” advising that “[m]alicious actors have adjusted their ransomware tactics over time to include pressuring victims for payment by threatening to release stolen data if they refuse to pay and publicly naming and shaming victims as secondary forms of extortion.”<sup>10</sup>

27. Stolen PII is often trafficked on the dark web, as is the case here. Law enforcement has difficulty policing the dark web due to this encryption, which allows users and criminals to conceal identities and online activity.

28. When malicious actors infiltrate companies and copy and exfiltrate the PII that those companies store, that stolen information often ends up on the dark web because the malicious actors buy and sell that information for profit.<sup>11</sup>

29. Another example is when the U.S. Department of Justice announced its seizure of AlphaBay in 2017, AlphaBay had more than 350,000 listings, many of which concerned stolen or fraudulent documents that could be used to assume another person’s identity. Other marketplaces, similar to the now-defunct AlphaBay, “are awash with [PII] belonging to victims from countries

---

<sup>9</sup> <https://www.zdnet.com/article/ransomware-mentioned-in-1000-sec-filings-over-the-past-year/> (last visited July 22, 2024).

<sup>10</sup> See [https://www.cisa.gov/sites/default/files/2023-01-CISA\\_MSISAC\\_Ransomware%20Guide\\_8508C.pdf](https://www.cisa.gov/sites/default/files/2023-01-CISA_MSISAC_Ransomware%20Guide_8508C.pdf) (last visited July 22, 2024).

<sup>11</sup> *Shining a Light on the Dark Web with Identity Monitoring*, *IdentityForce*, Dec. 28, 2020, <https://www.identityforce.com/blog/shining-light-dark-web-identity-monitoring> (last visited July 22, 2024).

all over the world. One of the key challenges of protecting PII online is its pervasiveness. As data breaches in the news continue to show, PII about employees, customers and the public is housed in all kinds of organizations, and the increasing digital transformation of today's businesses only broadens the number of potential sources for hackers to target.”<sup>12</sup>

30. The PII of consumers remains of high value to criminals, as evidenced by the prices they will pay through the dark web. Numerous sources cite dark web pricing for stolen identity credentials. For example, PII can be sold at a price ranging from \$40 to \$200, and bank details have a price range of \$50 to \$200<sup>9</sup>.<sup>13</sup> Experian reports that a stolen credit or debit card number can sell for \$5 to \$110 on the dark web.<sup>14</sup> Criminals can also purchase access to entire company data breaches.<sup>15</sup>

31. Once PII is sold, it is often used to gain access to various areas of the victim's digital life, including bank accounts, social media, credit card, and tax details. This can lead to additional PII being harvested from the victim, as well as PII from family, friends and colleagues of the original victim.

32. According to the FBI's Internet Crime Complaint Center (IC3) 2019 Internet Crime Report, Internet-enabled crimes reached their highest number of complaints and dollar losses in 2019, resulting in more than \$3.5 billion in losses to individuals and business victims.

<sup>13</sup> *Your personal data is for sale on the dark web. Here's how much it costs*, Digital Trends, Oct. 16, 2019, <https://www.digitaltrends.com/computing/personal- data-sold-on-the-dark-web- how-much-it-costs/> (last visited July 22, 2024).

<sup>14</sup> *Here's How Much Your Personal Information Is Selling for on the Dark Web*, Experian, Dec. 6, 2017, <https://www.experian.com/blogs/ask-experian/heres-how-much-your-personal-information-is- selling-for-on-the-dark-web/> (last visited July 22, 2024).

<sup>15</sup> *In the Dark*, VPNOversight, 2019, <https://vpnoverview.com/privacy/anonymous- browsing/in-the- dark/> (last visited July 22, 2024).

33. Victims of identity theft also often suffer embarrassment, blackmail, or harassment in person or online, and/or experience financial losses resulting from fraudulently opened accounts or misuse of existing accounts.

34. Data breaches facilitate identity theft as hackers obtain consumers' PII and thereafter use it to siphon money from current accounts, open new accounts in the names of their victims, or sell consumers' PII to others who do the same.

35. For example, the United States Government Accountability Office noted in a June 2007 report on data breaches (the "GAO Report") that criminals use PII to open financial accounts, receive government benefits, and make purchases and secure credit in a victim's name.<sup>16</sup> The GAO Report further notes that this type of identity fraud is the most harmful because it may take some time for a victim to become aware of the fraud, and can adversely impact the victim's credit rating in the meantime. The GAO Report also states that identity theft victims will face "substantial costs and inconveniences repairing damage to their credit records . . . [and their] good name."<sup>17</sup>

36. The market for PII has continued unabated to the present, and in 2023 the number of reported data breaches in the United States increased by 78% over 2022, reaching 3205 data breaches.<sup>18</sup>

37. The exposure of Plaintiff's and Class Members' PII to cybercriminals will continue to cause substantial risk of future harm (including identity theft) that is continuing and imminent

---

<sup>16</sup> See Government Accountability Office, *Personal Information: Data Breaches are Frequent, but Evidence of Resulting Identity Theft is Limited; However, the Full Extent is Unknown* (June 2007), <https://www.gao.gov/assets/gao-07-737.pdf> (last visited July 22, 2024).

<sup>17</sup> *Id.*

<sup>18</sup> Beth Maundrill, *Data Privacy Week: US Data Breaches Surge, 2023 Sees 78% Increase in Compromises*, INFOSECURITY MAGAZINE (Jan. 23, 2024); <https://www.infosecurity-magazine.com/news/us-data-breaches-surge-2023/> (last visited July 22, 2024); see also Identity Theft Resource Center, *2023 Data Breach Report*, <https://www.idtheftcenter.org/publication/2023-data-breach-report/> (last visited July 22, 2024).

in light of the many different avenues of fraud and identity theft utilized by third-party cybercriminals to profit off of this highly sensitive information.

**C. Defendants Failed to Comply with Regulatory Requirements and Standards.**

38. Federal and state regulators have established security standards and issued recommendations to temper data breaches and the resulting harm to consumers and employees. There are a number of state and federal laws, requirements, and industry standards governing the protection of PII.

39. For example, at least 24 states have enacted laws addressing data security practices that require businesses that own, license, or maintain PII about a resident of that state to implement and maintain “reasonable security procedures and practices” and to protect PII from unauthorized access.

40. Additionally, cybersecurity firms have promulgated a series of best practices that at a minimum should be implemented by sector participants including, but not limited to: installing appropriate malware detection software; monitoring and limiting network ports; protecting web browsers and email management systems; setting up network systems such as firewalls, switches, and routers; monitoring and protecting of physical security systems; protecting against any possible communication system; and training staff regarding critical points.<sup>19</sup>

41. The FTC has issued several guides for businesses, highlighting the importance of reasonable data security practices. According to the FTC, the need for data security should be considered for all business decision-making.<sup>20</sup>

---

<sup>19</sup> See *Addressing BPO Information Security: A Three-Front Approach*, DATAMARK, INC. (Nov. 2016), <https://insights.datamark.net/addressing-bpo-information-security> (last visited July 22, 2024).

<sup>20</sup> *Start With Security*, Fed. Trade Comm'n (“FTC”), <https://www.ftc.gov/system/files/documents/plain-language/pdf0205-startwithsecurity.pdf> (last visited July 22, 2024).

42. Under the FTC's 2016 *Protecting Personal Information: Guide for Business* publication, the FTC notes that businesses should safeguard the personal customer information they retain; properly dispose of unnecessary personal information; encrypt information stored on computer networks; understand their network's vulnerabilities; and implement policies to rectify security issues.<sup>21</sup>

43. The guidelines also suggest that businesses use an intrusion detection system to expose a breach as soon as it happens, monitor all incoming traffic for activity indicating someone is trying to hack the system, watch for large amounts of data being siphoned from the system, and have a response plan in the event of a breach.

44. The FTC advises companies to not keep information for periods of time longer than needed to authorize a transaction, restrict access to private information, mandate complex passwords to be used on networks, utilize industry-standard methods for security, monitor for suspicious activity on the network, and verify that third-party service providers have implemented reasonable security measures.<sup>22</sup>

45. The FTC has brought enforcement actions against companies for failing to adequately and reasonably protect consumer data, treating the failure to do so as an unfair act or practice barred by Section 5 of the Federal Trade Commission Act ("FTCA"), 15 U.S.C. § 45. Orders originating from these actions further elucidate the measures businesses must take to satisfy their data security obligations.

---

<sup>21</sup>*Protecting Personal Information: A Guide for Business*, FTC, [https://www.ftc.gov/system/files/documents/plain-language/pdf-0136\\_proteting-personal-information.pdf](https://www.ftc.gov/system/files/documents/plain-language/pdf-0136_proteting-personal-information.pdf) (last visited July 22, 2024).

<sup>22</sup> *Supra* n.39.

46. Defendants' failure to employ reasonable and appropriate measures to protect against unauthorized access to confidential consumer data constitutes an unfair act or practice prohibited by Section 5 of the FTCA, 15 U.S.C. § 45.

47. Defendants' failure to verify that it had implemented reasonable security measures constitutes an unfair act or practice prohibited by Section 5 of the FTCA, 15 U.S.C. § 45.

**D. Defendants Failed to Comply with Industry Practices.**

48. Various cybersecurity industry best practices have been published and should be consulted as a go-to resource when developing an organization's cybersecurity standards. The Center for Internet Security ("CIS") promulgated its Critical Security Controls, which identify the most commonplace and essential cyber-attacks that affect businesses every day and proposes solutions to defend against those cyber-attacks.<sup>23</sup> All organizations collecting and handling PII, such as Defendants, are strongly encouraged to follow these controls.

49. Further, the CIS Benchmarks are the overwhelming option of choice for auditors worldwide when advising organizations on the adoption of a secure build standard for any governance and security initiative, including PCI DSS, NIST 800-53, SOX, FISMA, ISO/IEC 27002, Graham Leach Bliley and ITIL.<sup>24</sup>

50. Several best practices have been identified that a minimum should be implemented by data management companies like Defendants, including but not limited to securely configuring business software, managing access controls and vulnerabilities to networks, systems, and

---

<sup>23</sup> Center for Internet Security, *Critical Security Controls*, at 1 (May 2021), <https://learn.cisecurity.org/CIS-Controls-v8-guide-pdf> (last visited July 22, 2024).

<sup>24</sup> See *CIS Benchmarks FAQ*, Center for Internet Security, <https://www.cisecurity.org/cis-benchmarks/cis-benchmarks-faq/> (last visited July 22, 2024).

software, maintaining network infrastructure, defending networks, adopting data encryption while data is both in transit and at rest, and securing application software.<sup>25</sup>

51. Defendants failed to follow these and other industry standards to adequately protect the PII of Plaintiff and Class Members.

**E. The Data Breach Caused Injury to Class Members and Will Result in Additional Harm Such as Fraud.**

52. Without detailed disclosure to the victims of the Data Breach, individuals whose PII was compromised by the Data Breach, including Plaintiff and Class Members, were unknowingly and unwittingly exposed to continued misuse and ongoing risk of misuse of their PII for months without being able to take available precautions to prevent imminent harm.

53. The ramifications of Defendants' failure to secure Plaintiff's and Class Members' data are severe.

54. Victims of data breaches are much more likely to become victims of identity theft and other types of fraudulent schemes. This conclusion is based on an analysis of four years of data that correlated each year's data breach victims with those who also reported being victims of identity fraud.

55. The FTC defines identity theft as "a fraud committed or attempted using the identifying information of another person without authority."<sup>26</sup> The FTC describes "identifying information" as "any name or number that may be used, alone or in conjunction with any other information, to identify a specific person."<sup>27</sup>

---

<sup>25</sup> See Center for Internet Security, *Critical Security Controls* (May 2021), <https://learn.cisecurity.org/CIS-Controls-v8-guide-pdf> (last visited July 22, 2024).

<sup>26</sup> 17 C.F.R. § 248.201 (2013).

<sup>27</sup> *Id.*

56. Identity thieves can use PII, such as that of Plaintiff and Class Members, which Defendants failed to keep secure, to perpetrate a variety of crimes that harm victims. For instance, identity thieves may commit various types of government fraud such as: immigration fraud; obtaining a driver's license or identification card in the victim's name but with another's picture; using the victim's information to obtain government benefits; or filing a fraudulent tax return using the victim's information to obtain a fraudulent refund.

57. As demonstrated herein, these and other instances of fraudulent misuse of the compromised PII has already occurred and are likely to continue.

58. Reimbursing a consumer for a financial loss due to fraud does not make that individual whole again. On the contrary, identity theft victims must spend numerous hours and their own money repairing the impact to their credit. After conducting a study, the Department of Justice's Bureau of Justice Statistics ("BJS") found that identity theft victims "reported spending an average of about 7 hours clearing up the issues" and resolving the consequences of fraud in 2014.<sup>28</sup>

59. The 2017 Identity Theft Resource Center survey<sup>29</sup> evidences the emotional suffering experienced by victims of identity theft:

- 75% of respondents reported feeling severely distressed;
- 67% reported anxiety;
- 66% reported feelings of fear related to personal financial safety;
- 37% reported fearing for the financial safety of family members;
- 24% reported fear for their physical safety;

---

<sup>28</sup> *Victims of Identity Theft*, Bureau of Justice Statistics (Sept. 2015) <http://www.bjs.gov/content/pub/pdf/vit14.pdf> (last visited July 22, 2024).

<sup>29</sup> *Id.*

- 15.2% reported a relationship ended or was severely and negatively impacted by identity theft; and
- 7% reported feeling suicidal.

60. Identity theft can also exact a physical toll on its victims. The same survey reported that respondents experienced physical symptoms stemming from their experience with identity theft:

- 48.3% of respondents reported sleep disturbances;
- 37.1% reported an inability to concentrate / lack of focus;
- 28.7% reported they were unable to go to work because of physical symptoms;
- 23.1% reported new physical illnesses (aches and pains, heart palpitations, sweating, stomach issues); and
- 12.6% reported a start or relapse into unhealthy or addictive behaviors.<sup>30</sup>

61. There may be a time lag between when harm occurs versus when it is discovered, and also between when private information is stolen and when it is used. According to the U.S. Government Accountability Office (“GAO”), which conducted a study regarding data breaches:

[L]aw enforcement officials told us that in some cases, stolen data may be held for up to a year or more before being used to commit identity theft. Further, once stolen data have been sold or posted on the Web, fraudulent use of that information may continue for years. As a result, studies that attempt to measure the harm resulting from data breaches cannot necessarily rule out all future harm.<sup>31</sup>

Thus, Plaintiff and Class Members now face years of constant surveillance of their financial and personal records, monitoring, and loss of rights.

---

<sup>30</sup> *Id.*

<sup>31</sup> GAO, *Report to Congressional Requesters*, at 29 (June 2007), <http://www.gao.gov/new.items/d07737.pdf> (last visited July 22, 2024).

**F. Plaintiff and Class Members Suffered Damages.**

62. As a direct and proximate result of Defendants' wrongful actions and inaction and the resulting Data Breach, Plaintiff and Class Members have already been harmed by the fraudulent misuse of their PII, and have been placed at an imminent, immediate, and continuing increased risk of additional harm from identity theft and identity fraud, requiring them to take the time which they otherwise would have dedicated to other life demands such as work and family in an effort to mitigate both the actual and potential impact of the Data Breach on their lives. Such mitigatory actions include, *inter alia*, placing "freezes" and "alerts" with credit reporting agencies, contacting their financial institutions, closing or modifying financial accounts, closely reviewing and monitoring their credit reports and accounts for unauthorized activity, sorting through dozens of phishing and spam email, text, and phone communications, and filing police reports. This time has been lost forever and cannot be recaptured.

63. Defendants' wrongful actions and inaction directly and proximately caused the theft and dissemination into the public domain of Plaintiff's and Class Members' PII, causing them to suffer, and continue to suffer, economic damages and other actual harm for which they are entitled to compensation, including:

- a. theft and misuse of their personal and financial information;
- b. the imminent and certainly impending injury flowing from potential fraud and identity theft posed by their PII being placed in the hands of criminals and misused via the sale of Plaintiff's and Class Members' information on the Internet's black market;
- c. the untimely and inadequate notification of the Data Breach;
- d. the improper disclosure of their PII;

- e. loss of privacy;
- f. ascertainable losses in the form of out-of-pocket expenses and the value of their time reasonably incurred to remedy or mitigate the effects of the Data Breach;
- g. ascertainable losses in the form of deprivation of the value of their PII, for which there is a well-established national and international market;
- h. the loss of productivity and value of their time spent to address, attempt to ameliorate, mitigate, and deal with the actual and future consequences of the Data Breach, including finding fraudulent charges, cancelling and reissuing cards, purchasing credit monitoring and identity theft protection services, imposition of withdrawal and purchase limits on compromised accounts, and the inconvenience, nuisance and annoyance of dealing with all such issues resulting from the Data Breach; and
- i. nominal damages.

64. While Plaintiff's and Class Members' PII has been stolen, Defendants continue to hold Plaintiff's and Class Members' PII. Particularly because Defendants have demonstrated an inability to prevent a breach or stop it from continuing even after being detected, Plaintiff and Class Members have an undeniable interest in ensuring that their PII is secure, remains secure, is properly and promptly destroyed, and is not subject to further theft.

#### **G. Plaintiff's Experience.**

65. Plaintiff William Kirby was a customer of AT&T and gave AT&T PII and other private information, including his text messages, call records, and location data from cellular tower records, as a necessary condition of receiving services.

66. Plaintiff provided PII and other private information, directly or indirectly, to

Defendants on the condition that it be maintained as confidential and with the understanding that Defendants would employ reasonable safeguards to protect it.

67. Since the Data Breach, Plaintiff has noticed a marked spike in spam texts asking him to respond. He has experienced anxiety and increased concerns for the loss of his privacy, as well as anxiety over the impact of cybercriminals accessing and using his PII and other private information.

68. Plaintiff would not have entrusted his PII and other private information to Defendants had he known they would not take reasonable steps to safeguard his information.

69. Plaintiff has a continuing interest in ensuring that his PII and other private information, which, upon information and belief, remains backed up in Defendants' possession, is protected and safeguarded from future breaches.

70. Plaintiff is very careful about sharing sensitive PII and other private information. He stores documents containing PII in safe and secure locations and has never knowingly transmitted unencrypted sensitive PII over the Internet or any other unsecured source. Plaintiff would not have entrusted his PII to Defendants had he known of Defendants' lax data security policies.

71. As a direct and proximate result of the Data Breach, Plaintiff has made reasonable efforts to mitigate the impact of the Data Breach, including by regularly and closely monitoring his financial accounts.

72. As a result of the Data Breach, Plaintiff anticipates spending considerable time and money on an ongoing basis to try to mitigate and address the harms caused by the Data Breach. He has faced and faces a present and continuing risk of fraud and identity theft for his lifetime.

## **CLASS ALLEGATIONS**

73. Plaintiff brings this class action individually on behalf of himself and all members of the following Class of similarly situated persons pursuant to Federal Rule of Civil Procedure 23. Plaintiff seeks certification under Fed. R. Civ. P. 23(a), (b)(2), and (b)(3) of the following Class:

All persons residing in the United States whose PII was compromised in the Data Breach, including all who were sent a notice of the Data Breach.

74. Excluded from the Class are Defendants and its affiliates, parents, subsidiaries, officers, agents, and directors, any entities in which Defendants has a controlling interest, as well as the judge(s) presiding over this matter and the clerks, judicial staff, and immediate family members of said judge(s).

75. Plaintiff reserves the right to modify or amend the foregoing Class definitions before the Court determines whether certification is appropriate.

76. Numerosity: The members in the Class are so numerous that joinder of all Class Members in a single proceeding would be impracticable. As noted above, it has been reported that approximately 110 million individuals' information was exposed in the Data Breach.

77. Commonality and Predominance: Common questions of law and fact exist as to all Class Members and predominate over any potential questions affecting only individual Class Members. These common questions of law or fact include, *inter alia*:

- a. Whether Defendants engaged in the conduct alleged herein;
- b. Whether Defendants had a duty to implement and maintain reasonable security procedures and practices to protect and secure Plaintiff's and Class Members' PII from unauthorized access and disclosure;

- c. Whether Defendants' computer systems and data security practices used to protect Plaintiff's and Class Members' PII violated the FTC Act and/or state laws, and/or Defendants' other duties discussed herein;
- d. Whether Defendants failed to adequately respond to the Data Breach, including failing to investigate it diligently and notify affected individuals in the most expedient time possible and without unreasonable delay, and whether this caused damages to Plaintiff and Class Members;
- e. Whether Defendants unlawfully shared, lost, or disclosed Plaintiff's and Class Members' PII;
- f. Whether Defendants' data security systems prior to and during the Data Breach complied with applicable data security laws and regulations;
- g. Whether Defendants' data security systems prior to and during the Data Breach were consistent with industry standards;
- h. Whether Plaintiff and Class Members suffered injury as a proximate result of Defendants' negligent actions or failures to act;
- i. Whether Defendants failed to exercise reasonable care to secure and safeguard Plaintiff's and Class Members' PII;
- j. Whether Defendants breached duties to protect Plaintiff's and Class Members' PII;
- k. Whether Defendants' actions and inactions alleged herein were negligent;
- l. Whether Defendants were unjustly enriched by their conduct as alleged herein;

- m. Whether an implied contract existed between Class Members and Defendants with respect to protecting PII and privacy, and whether that contract was breached;
- n. Whether Plaintiff and Class Members are entitled to actual and/or statutory damages or other relief, and the measure of such damages and relief;
- o. Whether Plaintiff and Class Members are entitled to additional credit or identity monitoring and monetary relief; and
- p. Whether Plaintiff and Class Members are entitled to equitable relief, including injunctive relief, restitution, disgorgement, and/or the establishment of a constructive trust.

78. Defendants engaged in a common course of conduct giving rise to the legal rights sought to be enforced by Plaintiff on behalf of himself and all other Class Members. Individual questions, if any, pale in comparison, in both quantity and quality, to the numerous common questions that dominate this action.

79. Typicality: Plaintiff's claims are typical of the claims of the Class. Plaintiff, like all proposed members of the Class, had his PII compromised in the Data Breach. Plaintiff and Class Members were injured by the same wrongful acts, practices, and omissions committed by Defendants, as described herein. Plaintiff's claims therefore arise from the same practices or course of conduct that give rise to the claims of all Class Members.

80. Adequacy: Plaintiff will fairly and adequately protect the interests of the Class Members. Plaintiff is an adequate representative of the Class and has no interests adverse to, or conflict with, the Class he seeks to represent. Plaintiff has retained counsel with substantial

experience and success in the prosecution of complex consumer protection class actions of this nature.

81. Superiority: A class action is superior to any other available means for the fair and efficient adjudication of this controversy, and no unusual difficulties are likely to be encountered in the management of this class action. The damages and other financial detriment suffered by Plaintiff and all other Class Members are relatively small compared to the burden and expense that would be required to individually litigate their claims against Defendants, so it would be impracticable for Class Members to individually seek redress from Defendants' wrongful conduct. Even if Class Members could afford individual litigation, the court system could not. Individualized litigation creates a potential for inconsistent or contradictory judgments and increases the delay and expense to all parties and the court system. By contrast, the class action device presents far fewer management difficulties and provides the benefits of single adjudication, economy of scale, and comprehensive supervision by a single court.

82. Injunctive and Declaratory Relief: Defendants have acted and/or refused to act on grounds generally applicable to the Class such that final injunctive relief and/or corresponding declaratory relief is appropriate as to the Class as a whole.

83. Likewise, particular issues are appropriate for certification under Rule 24(c)(4) because such claims present only particular, common issues, the resolution of which would advance the disposition of this matter and the parties' interests therein. Such issues include, but are not limited to: (a) whether Defendants owed a legal duty to Plaintiff and Class Members to exercise due care in collecting, storing, and safeguarding their PII; (b) whether Defendants failed to adequately monitor and audit their data security systems; and (c) whether Defendants failed to take reasonable steps to safeguard the PII of Plaintiff and Class Members.

84. All members of the proposed Class are readily ascertainable. Defendants have access to the names in combination with addresses and/or e-mail addresses of Class Members affected by the Data Breach. Indeed, impacted Class Members already have been preliminarily identified and sent a breach notice letter.

### **CAUSES OF ACTION**

#### **COUNT I** **NEGLIGENCE** **(On Behalf of Plaintiff and the Class Against Defendants)**

85. Plaintiff restates and realleges paragraphs 1 through 84 above as if fully set forth herein.

86. Defendants' clients require their customers to submit non-public PII and other private information (like location data) as a condition of receiving services.

87. Defendants gathered and stored the PII and other private information of Plaintiff and Class Members as part of its business, which affects commerce.

88. Plaintiff and Class Members entrusted Defendants with their PII and other private information with the understanding that the information would be safeguarded.

89. Defendants had full knowledge of the sensitivity of the PII and the types of harm that Plaintiff and Class Members could and would suffer if their PII were wrongfully disclosed.

90. By assuming the responsibility to collect and store this data, Defendants had duties of care to use reasonable means to secure and to prevent disclosure of the information, and to safeguard the information from theft.

91. Defendants owed a duty of care to Plaintiff and Class Members to provide data security consistent with industry standards and other requirements discussed herein, and to ensure

that their systems and networks, and the personnel responsible for them, adequately protected the PII.

92. Defendants' duty to use reasonable security measures arose as a result of the special relationship that existed between Defendants, on the one hand, and Plaintiff and Class Members, on the other hand. That special relationship arose because Defendants were entrusted with their confidential PII as a condition of receiving services.

93. Defendants also had a duty to exercise appropriate clearinghouse practices to remove former customers' PII they were no longer required to retain pursuant to regulations.

94. Moreover, Defendants had a duty to promptly and adequately notify Plaintiff and the Class of the Data Breach, but failed to do so.

95. Defendants had and continue to have duties to adequately disclose that Plaintiff's and Class Members' PII within Defendants' possession might have been compromised, how it was compromised, and precisely the types of data that were compromised and when. Such notice was necessary to allow Plaintiff and the Class to take steps to prevent, mitigate, and repair any identity theft and the fraudulent use of their PII by third parties.

96. Defendants breached their duties and thus was negligent, by failing to use reasonable measures to protect Plaintiff's and Class Members' PII. The specific negligent acts and omissions committed by Defendants include, but are not limited to, the following:

- a. Failing to adopt, implement, and maintain adequate security measures to safeguard Class Members' PII;
- b. Failing to adequately monitor the security of their networks and systems;
- c. Allowing unauthorized access to Class Members' PII;

- d. Failing to detect in a timely manner that Class Members' PII had been compromised;
- e. Failing to remove former customers' PII they were no longer required to retain pursuant to regulations; and
- f. Failing to timely and adequately notify Class Members about the Data Breach's occurrence and scope, so that they could take appropriate steps to mitigate the potential for identity theft and other damages.

97. Defendants breached their duties to Plaintiff and Class Members by failing to provide fair, reasonable, or adequate computer systems and data security practices to safeguard Plaintiff's and Class Members' PII.

98. Defendants knew or should have known that their failure to implement reasonable data security measures to protect and safeguard Plaintiff's and Class Members' PII would cause damage to Plaintiff and the Class.

99. The FTC has pursued enforcement actions against businesses, which, as a result of their failure to employ reasonable data security measures and avoid unfair and deceptive practices, caused the same harm as that suffered by Plaintiff and the Class.

100. A breach of security, unauthorized access, and resulting injury to Plaintiff and the Class was reasonably foreseeable, particularly in light of Defendants' inadequate security practices.

101. It was foreseeable that Defendants' failure to use reasonable measures to protect Class Members' PII would result in injury to Class Members. Further, the breach of security was reasonably foreseeable given the known high frequency of corporate cyberattacks and data breaches.

102. Defendants had full knowledge of the sensitivity of the PII and the types of harm that Plaintiff and the Class could and would suffer if the PII were wrongfully disclosed.

103. Plaintiff and the Class were the foreseeable and probable victims of any inadequate security practices and procedures. Defendants knew or should have known of the inherent risks in collecting and storing PII, the critical importance of providing adequate security of that PII, and the necessity for encrypting PII stored on its systems.

104. Plaintiff and the Class had no ability to protect their PII that was in, and possibly remains in, Defendants' possession.

105. Defendants was in a position to protect against the harm suffered by Plaintiff and the Class as a result of the Data Breach.

106. Defendants' duties extended to protecting Plaintiff and the Class from the risk of foreseeable criminal conduct of third parties, which have been recognized in situations where the actor's own conduct or misconduct exposes another to the risk or defeats protections put in place to guard against the risk, or where the parties are in a special relationship.<sup>32</sup> Numerous courts and legislatures have also recognized the existence of a specific duty to reasonably safeguard personal information.

107. Defendants have admitted that the PII of Plaintiff and the Class was wrongfully lost and disclosed to unauthorized third persons as a result of the Data Breach.

108. But for Defendants' wrongful and negligent breaches of duties owed to Plaintiff and the Class, Plaintiff's and Class Members' PII would not have been compromised.

109. There is a close causal connection between Defendants' failure to implement security measures to protect Plaintiff's and Class Members' PII, and the harm, or risk of imminent

---

<sup>32</sup> See Restatement (Second) of Torts § 302B.

harm, suffered by Plaintiff and the Class. PII was lost and accessed as the proximate result of Defendants' failure to exercise reasonable care by adopting, implementing, and maintaining appropriate security measures.

110. As a direct and proximate result of Defendants' negligence, Plaintiff and the Class have suffered and will suffer injury, including but not limited to: (i) the actual misuse of their compromised PII; (ii) invasion of privacy; (iii) lost or diminished value of PII; (iv) lost time and opportunity costs associated with attempting to mitigate the actual consequences of the Data Breach; (v) loss of benefit of the bargain; (vi) an increase in spam calls, texts, and/or emails (vii) the continued and certainly increased risk to their PII, which: (a) remains unencrypted and available for unauthorized third parties to access and abuse; and (b) remains backed up in Defendants' possession and is subject to further unauthorized disclosures so long as Defendants fail to undertake appropriate and adequate measures to protect the PII; (viii) future costs in terms of time, effort and money that will be expended to prevent, detect, contest, and repair the inevitable and continuing consequences of compromised PII for the rest of their lives; (ix) the present value of ongoing credit monitoring and identity defense services necessitated by Defendants' data breach; (x) the value of the unauthorized access to their PII permitted by Defendant; and (xi) any nominal damages that may be awarded.

111. As a direct and proximate result of Defendants' negligence, Plaintiff and the Class have suffered and will continue to suffer other forms of injury and/or harm, including, but not limited to, anxiety, emotional distress, loss of privacy, and other economic and non-economic losses including nominal damages.

112. Plaintiff and Class Members are entitled to compensatory and consequential damages suffered as a result of the Data Breach.

113. Defendants' negligent conduct is ongoing, in that it still possesses Plaintiff's and Class Members' PII in an unsafe and insecure manner.

114. Plaintiff and Class Members are entitled to injunctive relief requiring Defendants to: (i) strengthen its data security systems and monitoring procedures; (ii) submit to future annual audits of those systems and monitoring procedures; and (iii) continue to provide adequate credit monitoring to all Class Members.

**COUNT II**  
**NEGLIGENCE PER SE**  
**(On Behalf of Plaintiff and the Class Against Defendants)**

115. Plaintiff restates and realleges paragraphs 1 through 84 above as if fully set forth herein.

116. Defendants had duties arising under the FTC Act to protect Plaintiff's and Class Members' PII.

117. Defendants breached their duties, pursuant to the FTC Act and other applicable standards, and thus was negligent, by failing to use reasonable measures to protect Plaintiff's and Class Members' PII. The specific negligent acts and omissions committed by Defendants include, but are not limited to, the following: (i) failing to adopt, implement, and maintain adequate security measures to safeguard Class Members' PII; (ii) failing to adequately monitor the security of their networks and systems; (iii) allowing unauthorized access to Class Members' PII; (iv) failing to detect in a timely manner that Class Members' PII had been compromised; (v) failing to remove former customers' PII they were no longer required to retain pursuant to regulations; and (vi) failing to timely and adequately notify Class Members about the Data Breach's occurrence and scope, so that they could take appropriate steps to mitigate the potential for identity theft and other damages.

118. Defendants' violations of Section 5 of the FTC Act (and similar state statutes) constitute negligence *per se*.

119. Plaintiff and Class Members are consumers within the class of persons that Section 5 of the FTC Act were intended to protect.

120. The harm that has occurred is the type of harm the FTC Act were intended to guard against.

121. The FTC has pursued enforcement actions against businesses that, as a result of their failure to employ reasonable data security measures and avoid unfair and deceptive practices, caused the same harm as that suffered by Plaintiff and the Class.

122. Defendants breached their duties to Plaintiff and Class Members by failing to provide fair, reasonable, or adequate computer systems and data security practices to safeguard Plaintiff's and Class Members' PII.

123. In addition, under state data security and consumer protection statutes such as those outlined herein, Defendants had a duty to implement and maintain reasonable security procedures and practices to safeguard Plaintiff's and Class Members' PII.

124. Plaintiff and Class Members were foreseeable victims of Defendants' violations of the FTC Act, and state data security and consumer protection statutes. Defendants knew or should have known that their failure to implement reasonable data security measures to protect and safeguard Plaintiff's and Class Members' PII would cause damage to Plaintiff and the Class.

125. As a direct and proximate result of Defendants' negligence *per se*, Plaintiff and the Class have suffered and will suffer injury, including but not limited to: (i) the actual misuse of their compromised PII; (ii) invasion of privacy; (iii) lost or diminished value of PII; (iv) lost time and opportunity costs associated with attempting to mitigate the actual consequences of the Data

Breach; (v) loss of benefit of the bargain; (vi) an increase in spam calls, texts, and/or emails; and (vii) the continued and certainly increased risk to their PII, which: (a) remains unencrypted and available for unauthorized third parties to access and abuse; and (b) remains backed up in Defendants' possession and is subject to further unauthorized disclosures so long as Defendants fail to undertake appropriate and adequate measures to protect the PII.

126. As a direct and proximate result of Defendants' negligence *per se* Plaintiff and the Class have suffered and will continue to suffer other forms of injury and/or harm, including, but not limited to, anxiety, emotional distress, loss of privacy, and other economic and non-economic losses.

127. Finally, as a direct and proximate result of Defendants' negligence *per se*, Plaintiff and the Class have suffered and will suffer the continued risks of exposure of their PII, which remain in Defendants' possession and is subject to further unauthorized disclosures so long as Defendants fail to undertake appropriate and adequate measures to protect the PII in their continued possession.

**COUNT III**  
**BREACH OF IMPLIED CONTRACT**  
**(On Behalf of Plaintiff and the Class Against AT&T)**

128. Plaintiff restates and realleges paragraphs 1 through 84 above as if fully set forth herein.

129. This count is brought against AT&T (for purposes of this count "Defendant").

130. When Plaintiff and Class Members provided their personal information to Defendant, Plaintiff and Class Members entered into implied contracts with Defendant pursuant to which Defendant agreed to safeguard and protect such information and to timely and accurately notify Plaintiff and Class Members that their data had been breached and compromised.

131. Defendant required Plaintiff and Class Members to provide and entrust their PII and other private information as a necessary condition of receiving cellular phone and data services.

132. Plaintiff and Class Members would not have provided and entrusted their PII and other private information to Defendant in the absence of the implied contract between them and Defendant.

133. Plaintiff and Class Members fully performed their obligations under the implied contracts with Defendant.

134. Defendant breached the implied contracts it made with Plaintiff and Class Members by failing to safeguard and protect the personal information of Plaintiff and Class Members and by failing to provide timely and accurate notice to them that their personal information was compromised in and as a result of the Data Breach.

135. As a direct and proximate result of Defendant' breach of the implied contracts, Plaintiff and Class Members are entitled to damages, including compensatory, punitive, and/or nominal damages, and/or disgorgement or restitution, in an amount to be proven at trial.

**COUNT IV**  
**UNJUST ENRICHMENT**  
**(On Behalf of Plaintiff and the Class Against AT&T)**

136. Plaintiff restates and realleges paragraphs 1 through 84 as if fully set forth herein.

137. This count is brought against AT&T (for purposes of this count "Defendant").

138. This count is brought in the alternative to Plaintiff's breach of implied contract count.

139. Plaintiff and Class Members conferred a benefit on Defendant by way of customers' paying Defendant to maintain Plaintiff and Class Members' personal information.

140. The monies paid to Defendant were supposed to be used by Defendant, in part, to pay for the administrative and other costs of providing reasonable data security and protection to Plaintiff and Class Members.

141. Defendant failed to provide reasonable security, safeguards, and protections to the personal information of Plaintiff and Class Members, and as a result Defendant was overpaid.

142. Under principles of equity and good conscience, Defendant should not be permitted to retain the money because Defendant failed to provide adequate safeguards and security measures to protect Plaintiff and Class Members' PII and other private information that they paid for but did not receive.

143. Defendant wrongfully accepted and retained these benefits to the detriment of Plaintiff and Class Members.

144. Defendant' enrichment at the expense of Plaintiff and Class Members is and was unjust.

145. As a result of Defendant' wrongful conduct, as alleged above, Plaintiff and the Class are entitled to restitution and disgorgement of profits, benefits, and other compensation obtained by Defendant, plus attorneys' fees, costs, and interest thereon.

**COUNT V**  
**BREACH OF THIRD-PARTY BENEFICIARY CONTRACT**  
**(On Behalf of Plaintiff and the Class Against Snowflake)**

146. Plaintiff restates and realleges paragraphs 1 through 84 above as if fully set forth herein.

147. This count is brought against Snowflake (for purposes of this count "Defendant").

148. Upon information and belief, Defendant Snowflake entered into virtually identical contracts with its clients to provide administrative services, which included data security practices,

procedures, and protocols sufficient to safeguard the PII and other private information that was to be entrusted to it.

149. Such contracts were made expressly for the benefit of Plaintiff and the Class, as it was their PII and other private information that Defendant agreed to receive and protect through its services. Thus, the benefit of collection and protection of the PII and other private information belonging to Plaintiff and the Class was the direct and primary objective of the contracting parties, and Plaintiff and Class Members were direct and express beneficiaries of such contracts.

150. Defendant knew that if it were to breach these contracts with its clients, Plaintiff and the Class would be harmed.

151. Defendant breached its contracts with its clients and, as a result, Plaintiff and Class Members were affected by this Data Breach when Defendant failed to use reasonable data security and/or business associate monitoring measures that could have prevented the Data Breach.

152. As foreseen, Plaintiff and the Class were harmed by Defendant's failure to use reasonable data security measures to securely store and protect the files in its care, including but not limited to, the continuous and substantial risk of harm through the loss of their PII and other private information.

153. Accordingly, Plaintiff and the Class are entitled to damages in an amount to be determined at trial, along with costs and attorneys' fees incurred in this action.

**COUNT VI**  
**UNJUST ENRICHMENT**  
**(On Behalf of Plaintiff and the Class Against Snowflake)**

154. Plaintiff restates and realleges paragraphs 1 through 84 above as if fully set forth herein.

155. This count is brought against Snowflake (for purposes of this count "Defendant").

156. Plaintiff brings this claim in the alternative to her breach of third-party beneficiary contract claim above.

157. Plaintiff and Class Members conferred a monetary benefit on Defendant. Specifically, they provided Defendant with their PII and other private information. In exchange, Defendant should have provided adequate data security for Plaintiff and Class Members'.

158. Defendant knew that Plaintiff and Class Members conferred a benefit on it in the form their PII and other private information as a necessary part of their receiving services. Defendant appreciated and accepted that benefit. Defendant profited from these transactions and used the PII and other private information of Plaintiff and Class Members for business purposes.

159. Upon information and belief, Defendant funds its data security measures entirely from its general revenue, including payments on behalf of or for the benefit of Plaintiff and Class Members.

160. As such, a portion of the payments made for the benefit of or on behalf of Plaintiff and Class Members is to be used to provide a reasonable level of data security, and the amount of the portion of each payment made that is allocated to data security is known to Defendant.

161. Defendant, however, failed to secure Plaintiff and Class Members' PII and other private information and, therefore, did not provide adequate data security in return for the benefit Plaintiff and Class Members provided.

162. Defendant would not be able to carry out an essential function of its regular business without the PII and other private information of Plaintiff and Class Members and derived revenue by using it for business purposes. Plaintiff and Class Members expected that Defendant or anyone in Defendant's position would use a portion of that revenue to fund adequate data security practices.

163. Defendant acquired the PII and other private information through inequitable means in that it failed to disclose the inadequate security practices previously alleged.

164. If Plaintiff and Class Members knew that Defendant had not reasonably secured their PII and other private information, they would not have allowed their PII and other private information to be provided to Defendant.

165. Defendant enriched itself by saving the costs it reasonably should have expended on data security measures to secure Plaintiff and Class Members' PII and other private information. Instead of providing a reasonable level of security that would have prevented the hacking incident, Defendant instead calculated to increase its own profit at the expense of Plaintiff and Class Members by utilizing cheaper, ineffective security measures and diverting those funds to its own profit. Plaintiff and Class Members, on the other hand, suffered as a direct and proximate result of Defendant's decision to prioritize its own profits over the requisite security and the safety of their PII and other private information.

166. Under the principles of equity and good conscience, Defendant should not be permitted to retain the money wrongfully obtained Plaintiff and Class Members, because Defendant failed to implement appropriate data management and security measures that are mandated by industry standards.

167. Plaintiff and Class Members have no adequate remedy at law.

168. As a direct and proximate result of Defendant's conduct, Plaintiff and Class Members have suffered and will suffer injury, including but not limited to: (i) invasion of privacy; (ii) theft of their PII and other private information; (iii) lost or diminished value of PII and other private information; (iv) lost time and opportunity costs associated with attempting to mitigate the actual consequences of the Data Breach; (v) loss of benefit of the bargain; (vi) lost opportunity

costs associated with attempting to mitigate the actual consequences of the Data Breach; (vii) experiencing an increase in spam calls, texts, and/or emails; (viii) statutory damages; (ix) nominal damages; and (xi) the continued and certainly increased risk to their PII and other private information, which: (a) remains unencrypted and available for unauthorized third parties to access and abuse; and (b) remains backed up in Defendant's possession and is subject to further unauthorized disclosures so long as Defendant fails to undertake appropriate and adequate measures to protect the PII and other private information.

169. As a direct and proximate result of Defendant's conduct, Plaintiff and Class Members have suffered and will continue to suffer other forms of injury and/or harm.

170. Defendant should be compelled to disgorge into a common fund or constructive trust, for the benefit of Plaintiff and Class Members, proceeds that they unjustly received from them. In the alternative, Defendant should be compelled to refund the amounts that Plaintiff and Class Members were underpaid by Defendant.

#### **PRAYER FOR RELIEF**

Plaintiff, individually and on behalf of all other members of the class, respectfully requests that the Court enter judgment in Plaintiff's favor and against Defendants as follows:

A. Certifying the Class as requested herein, designating Plaintiff as Class representatives, and appointing Plaintiff's counsel as Class Counsel;

B. Awarding Plaintiff and the Class appropriate monetary relief, including actual damages, statutory damages, punitive damages, restitution, nominal damages and disgorgement;

C. Awarding Plaintiff and the Class equitable, injunctive, and declaratory relief, as may be appropriate. Plaintiff, on behalf of himself and the class, seek appropriate injunctive relief designed to prevent Defendants from experiencing another data breach by adopting and

implementing best data security practices to safeguard PII and other private information and to provide or extend credit monitoring services and similar services to protect against all types of identity theft;

D. Awarding Plaintiff and the Class pre-judgment and post-judgment interest to the maximum extent allowable;

E. Awarding Plaintiff and the Class reasonable attorneys' fees, costs, and expenses, as allowable; and

F. Awarding Plaintiff and the Class such other favorable relief as allowable under law.

**JURY TRIAL DEMAND**

Plaintiff demands a trial by jury of all claims in this Class Action Complaint so triable.

Dated: July 29, 2024.
